

Monthly Inflation Review • February 2022

The inflation rate in February 2022 amounted to 0,2%, which is 0,3 percentage points (p.p.) lower in comparison with the previous month, and 0,7 p.p. lower compared to the same month of 2021.

The prevailing inflation mainly resulted from the increase in prices for foodstuffs 0,6% (share in the inflation 0,3 p.p.). At the same time, prices for non-foodstuffs decreased this month by -0,2% (-0,05 p.p) and prices for paid services to the population by -0,3% (-0,05 p.p).

In the foodstuffs sector, the increase was mainly observed in prices for consumer goods such as milk of 7,0%, cabbage of 30,0%, onion of 19,9 pear of 2,8%, carrot of 3,6% and etc.

Moreover, the decrease was observed in prices for some foodstuffs including first grade flour of 0,2%, rice of 0,1%, lamb of 0,4%, cottonseed oil of 2,7%, sunflower oil of 2,8% etc.

In the non-foodstuffs sector for the reporting month, the decrease was mainly observed in prices for combustible materials of 4,5%, clothing of 0,1% and etc.

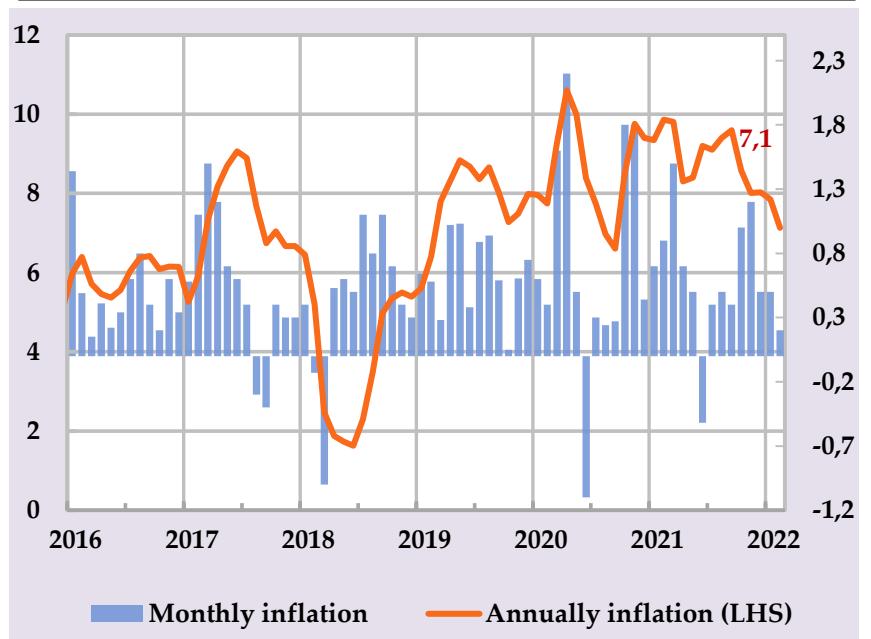

Prices and tariffs for paid services to the population in the reporting month demonstrated downward tendency, which was mainly caused by the decrease in prices for gas supply services by 11,5%.

The annual inflation in February 2022 amounted to 7,1%, which is 2,9 p.p. lower than the same period of the last year. It should be noted that the change in prices occurred mainly due to supply factors, seasonal factors, and external pressures.

The core inflation rate, partially reflecting monetary factors, remained unchanged in February this year and reached 1,8% per annum. This was mainly caused

by the increase in prices for non-foodstuffs and ready made foodstuffs.

The National Bank of Tajikistan will continue to pursue monetary policy to reduce the impact of monetary factors on inflation using monetary instruments to achieve the projected target.
