

The Refinancing Rate Remained Unchanged

At the regular meeting of the Monetary Policy Committee of the National Bank of Tajikistan No. 47 held on April 30, 2026, a decision was made to keep the refinancing rate unchanged at 7.00 percent per annum.

This decision was made based on an assessment of the current macroeconomic situation, including improved price stability in domestic and global commodity markets, the relative stability of the national currency, inflation remaining near the lower bound of the target range, and anchored inflation expectations.
