

Refinancing rate was reduced by 0.25 percentage point

At the regular meeting of the Monetary Policy Committee of the National Bank of Tajikistan dated February 6, 2025, No. 40, the Committee decided to lower the refinancing rate by **0.25 percentage points** and set it at **8.75 percent per annum**.

This decision was based on current trends in domestic and global commodity prices, the inflation rate remaining within the lower bound of the target range, and relatively stable inflation expectations.
